Education

2018

Advanced Software Engineering Immersive

Hack Reactor @ Galvanize, Playa Vista, CA

- Logged over 1000+ hours of fullstack development coding time in Javascript, SQL, HTML, CSS within both individual & teamwork environments.
- Engaged in various frameworks for these languages including React & Node.

2011

Bachelor of Science: Management Science

University of California - San Diego, La Jolla, CA

(Relevant Coursework: Intro to Computer Science)

Results-driven full-stack software developer, who values integrity & hard work as much as technical fundamentals. Knowing that my contributions make a positive impact on the team's objective keeps me motivated to constantly be learning & improving. Being around passionate people fuels my own passion for creativity & controlled innovation. Seeking to use Javascript to deliver coding excellence, but open to learning other languages as well!

Skills

Soft Skills

- Active communication / High emotional intelligence
- Efficient time management / Proactivity & adaptability

Technical Skills

- JavaScript (ES5&ES6) / React / HTML5, CSS3, Sass
- RESTful Routes, API, Axios
- Express.js / Node.js / SQL, noSql / MongoDB
- npm / Webpack / Git

Recent Projects Experience

Portfolio Website [Javascript/ React/ Sass/ Node]

Designed & developed personal branding website from ground up, using modular components

- Dynamically **responsive to different viewports** ranging from 360px to 1366+px
- Leveraged **SMTP server** to allow visitor e-mail submission directly from component

Amazon System Design [JS/ React/ PostgreSQL/ Nginx]

Agile team project optimizing the performance of an existing app (using minimum of **10M data points**)

- Utilized indexes to improve SQL (**SP-GiST and B-Tree**) & NoSQL db query speed; resulted in performance **optimizations by 1,450,000% (6,200ms to .427ms)**
- Further enhanced app efficiency by implementing **load balancers** and **stress testing**; # of successful req/sec increased from 80 to 1000

Airbnb Listing Replica [JS/ React/ Node/ MongoDB/ AWS EC2]

Collaborative application that replicated the design & functionality of Airbnb's property listings page

- Developed functional mockup of the amenities section & its modal using modular components
- Deployed using **proxy-server** on **AWS EC2** service to integrate micro-service architecture into one streamlined experience.

Work History

2019 - 2019

JavaScript Instructor

P&J Academy, NPO, Brea, CA

- Held volunteer position as a JavaScript instructor for 72 high-school students @ a non-profit organization
- Designed & taught curriculum for basic JavaScript concepts including: JS Objects, Classes, Prototypes, Closures, Hoisting, Promises

2012 - 2018

Director Of Financial Planning

Financial Masters, Los Angeles, CA

- Oversee consultants & staff responsible for strategic financial planning & management of 400+ clients worldwide
